Navis Maritime Solutions LLC-FZ

COMPANY PROFILE 2026

Engineered to execute. *Trusted to deliver.*

DUBAI · UNITED ARAB EMIRATES

ABOUT US

Your technical partner between ship and shipyard.

Navis Maritime Solutions is a Dubai-based maritime consultancy. We help shipowners, operators and shipyards plan, build, repair and supply their vessels, with engineers who know the work from the shipyard floor. Our role is simple: protect your vessel, your budget and your schedule. We bring project management, engineering, certified spare parts and inspection together, so you deal with one trusted partner.

WHO WE WORK WITH

Shipowners & operators	Shipyards	Equipment makers	Fabricators & contractors

1

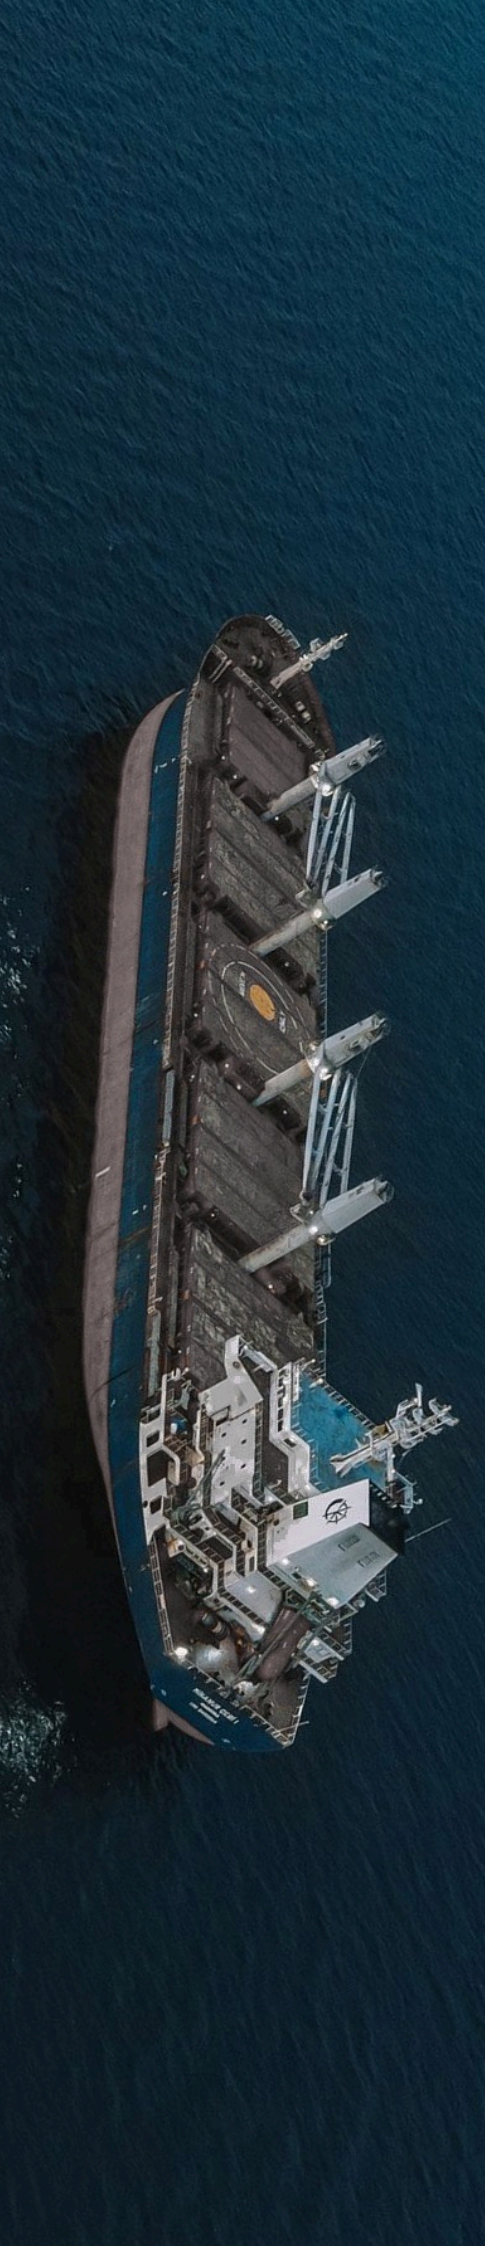

Our Vision

To be the partner shipowners and shipyards trust most to get vessels built, repaired and back to sea.

2

Our Mission

To protect our clients' vessels, budgets and schedules through hands-on project management, certified supply and honest technical advice.

WHY NAVIS

Four reasons clients choose us

1

Clear costs

We check every estimate and invoice, so there are no surprises.

2

Class-approved

Drawings and parts that meet IACS class rules and IMO regulations.

3

Fast supply

Certified spares sourced quickly, to keep downtime to a minimum.

4

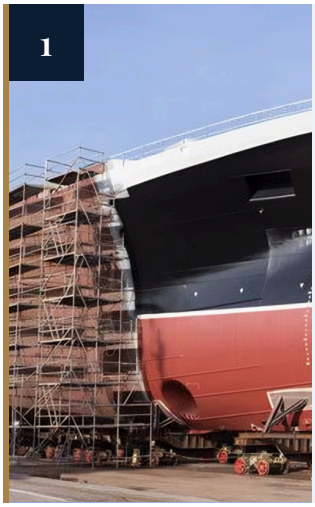

Engineers on site

Design support and shipyard presence from one team.

OUR SERVICES

Eight services. *One partner.*

1

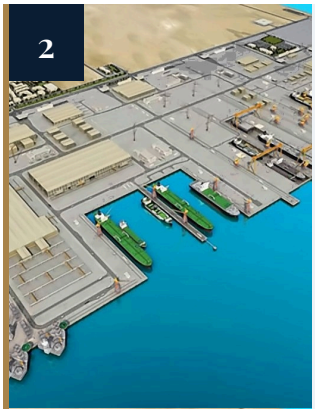

WHAT WE DO

Project Management Services

We act as the shipowner's dedicated on-site technical and commercial proxy at the shipyard, protecting your capital investments throughout the lifecycle of newbuilding, retrofits, conversions and major dry-docking turnarounds. From shipyard selection to final sign-off, we ensure that projects are delivered safely, on time and within budget. We bridge the gap between shipowners and shipyards, enforcing strict technical specifications, maintaining budget discipline and guaranteeing asset compliance with international classification standards.

2

WHAT WE DO

Shipyards Agent & Representative

We act as the official commercial partner and authorized agent for premier regional and international shipyards. By bridging the gap between global fabrication facilities and vessel operators, we provide shipowners with immediate access to secured drydock slots, while driving a high-yield contract pipeline directly into our represented shipyards.

3

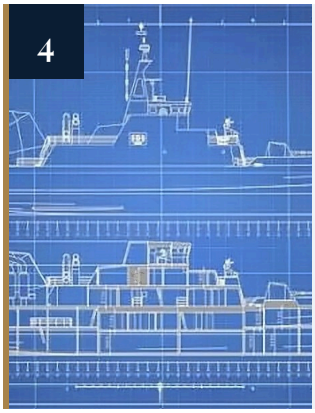

WHAT WE DO

Spare Parts Supply & Support

We specialize in the end-to-end supply, procurement and logistical delivery of high-quality spare parts for ships and boats. Leveraging our licensed operations in Dubai, we provide an exhaustive inventory of mission-critical components, from main engine propulsion and auxiliary machinery to deck equipment and specialized electrical systems, keeping your vessels at peak operational readiness.

4

WHAT WE DO

Engineering Consultancy in Shipbuilding

We provide a seamless, end-to-end engineering pipeline for ambitious newbuild designs and complex vessel conversion projects. By managing the entire technical life cycle, from the first lines plan to the final stamped certificate, we eliminate risk, optimize performance and guarantee compliance before construction begins.

Services 5 to 8

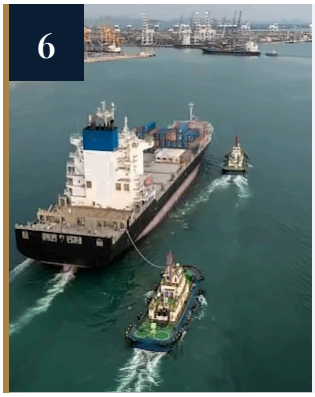

5

WHAT WE DO

Global Product Representation

We serve as the official global sales, business development and commercial representative for international maritime equipment manufacturers and marine software developers. By acting as your outsourced, high-calibre regional sales force, we leverage our established network to position your technical solutions directly in front of key decision-makers at shipyards, shipowners and operating fleets worldwide. We eliminate the high overhead, regulatory complexities and risks of establishing localized entities, delivering immediate market access and accelerated sales cycles through a trusted, global maritime footprint.

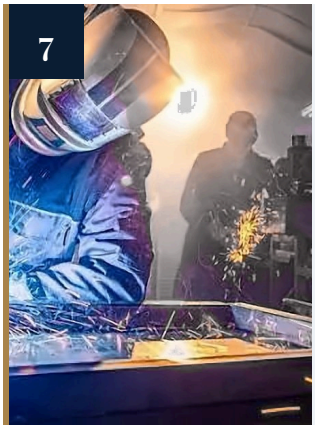

6

WHAT WE DO

Ship Chartering Support

We provide comprehensive ship chartering support and post-fixture operational management for cargo owners, ship operators and vessel owners. By combining real-time freight market intelligence with rigorous contract engineering, we help clients secure optimal tonnage, maximize vessel employment and insulate their commercial portfolios from volatile market shifts and costly operational delays. From initial market positioning to final laytime settlements, we act as your outsourced chartering desk to ensure seamless voyage execution.

7

WHAT WE DO

Marine & Industry Welder and Welding Qualification Advisory

We provide comprehensive Welder Qualification, Welding Procedure Specification (WPS), PQR and class liaison services for shipyards, afloat ship repair contractors, marine fabricators and industrial fabricators. We manage the entire technical and bureaucratic lifecycle required to secure official workshop and personnel approvals from leading international Classification Societies (e.g. DNV, ABS, LR, BV). By pairing practical metallurgical engineering with rigorous regulatory liaison, we eliminate failed laboratory tests, prevent project delays and ensure your facility maintains full, audit-ready commercial compliance.

8

WHAT WE DO

Fabrication Inspection Services (QA/QC)

We provide independent, third-party fabrication inspection and Quality Assurance/Quality Control (QA/QC) services directly at your shipyards, workshops and project sites. We monitor every stage of the manufacturing cycle to ensure your structural steel, pressure vessels and marine components strictly comply with engineering designs, client specifications and international regulatory standards. Our certified inspectors (AWS, CSWIP, NACE/FROSIO, BGAS) track project quality from raw material receipt through assembly, welding, non-destructive testing (NDT) and final protective coating applications. Acting as your independent eyes and ears on the shop floor, we enforce structural compliance, prevent manufacturing defects and guarantee that your assets are delivered in strict alignment with international engineering codes (AWS, ASME, API, ISO) and classification society standards.
